To Whom It May Concern:

This is in regards to Phyllis Mathewson Perry. Mrs. Perry is 84 years old and has numerous medical problems including liver cancer, macular degeneration, diabetes, hypertension and osteoporosis. Her husband Jim Perry is 86 years old. He has heart disease, with 3 past heart attacks, hypertension and a history of prostate cancer. In my opinion, as their doctor, it would be in the best interest of my patients to continue to live close to family where someone will be able to check on them often and to help out when necessary.

If you have any questions regarding this matter, please don't hesitate to contact my office at 775-423-4429.

Sincerely,

Apollo H. Vaz, M.D. PhD.
